**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusts around 50mph expected over ridges and summits and near showers.

Forecast for Thursday 29 Oct 2020

Weather: Showers die out overnight but cloud increases. Outbreaks of rain spread east towards the end of the night and turn persistent and heavy through the morning, especially over western and southern fells. Drier for a time in the late afternoon and early evening but rain returning later. Conditions underfoot likely to become very wet with fast flowing water courses expected.

Maximum wind: Southwesterly 25-30mph gradually increasing 35-45mph, with gusts, especially over southern fells, around 65mph expected over ridges and summits.

Chance of cloud free mountain/hill tops above 800m: Around 40% at first in the east with occasional or periods of cloud above 750m, otherwise little chance with periods or persistent cloud above 450-600m and patches below

Visibility: Good in the east at first, otherwise just a few kilometres in persistent rain.

Temperature: **Valleys:** Around plus 8 Celsius at dawn rising to plus 15 Celsius by day.
At 800m: Plus 3 Celsius rising to plus 8 Celsius.
Freezing level: Above the summits
